

Cookie Policy of Blueshell E-Sports Association Enschede

Last updated: February 23, 2026

Interpretation and Definitions

Interpretation

The words of which the initial letter is capitalized have meanings defined under the following conditions. The following definitions shall have the same meaning regardless of whether they appear in singular or in plural.

Definitions

For the purposes of this Cookie Policy:

- **Company** (referred to as either “the Company”, “We”, “Us” or “Our” in this Cookie Policy) refers to Blueshell E-Sports Association Enschede, Enschede.
- **Cookies** means small files that are placed on your computer, mobile device, or any other device by a website.
- **Website** refers to Blueshell, accessible from esa-blueshell.nl.
- **You** means the individual accessing or using the Website, or a company/legal entity on behalf of such individual.
- **Local Storage** means browser-based storage (for example `localStorage`) used to persist key/value data on your device.
- **Session Storage** means browser-based storage (for example `sessionStorage`) cleared when the browser session ends.

The Use of Cookies

Type of Cookies We Use

Cookies can be “Persistent” or “Session” cookies. Persistent cookies remain on your device when you go offline, while Session cookies are deleted when you close your browser.

We currently use session and persistent cookies for essential security and functionality.

Cookie and Storage Inventory

Cookies set by Blueshell application components

Name	Type	Set by	Purpose	Typical retention	Essential
BSH_ AUTH	Cookie	API backend	Authenticated session fallback for JWT token handling.	Until token expiry (configured to about 24h by default).	Yes

Name	Type	Set by	Purpose	Typical retention	Essential
XSRF-TOKEN	Cookie	API backend	CSRF protection for state-changing requests.	Session-like / regenerated with security flow.	Yes
login	Cookie	Frontend	Stores non-sensitive UI login/session state (userId, username, roles, expiry metadata; no auth token).	30 days (default frontend setting).	Functional
guestData	Cookie	Frontend	Stores guest event-signup edit context (name, email, discord, phone, guest access token).	30 days (default frontend setting).	Functional for guest edit flow

Browser storage used by the website

Storage key	Storage type	Purpose	Typical retention	Essential
esa-blueshell.nl:darkMode	Local Storage	Saves theme preference.	Until removed by user/browser.	Functional
esa-blueshell.nl:cookiesAccepted	Local Storage	Saves dismissal state of cookie snackbar.	Until removed by user/browser.	Functional
auth:ping	Local Storage	Cross-tab login-state synchronization signal.	Updated during auth sync; persists until cleared.	Functional
recovery:password-reset:token	Session Storage	Temporary recovery-token handling in password reset flow.	Session duration.	Essential for recovery flow
recovery:user-activation:token	Session Storage	Temporary token handling in user activation flow.	Session duration.	Essential for activation flow
recovery:member-activation:token	Session Storage	Temporary token handling in member activation flow.	Session duration.	Essential for activation flow

Third-Party Services and Potential Third-Party Cookies

When you use specific features, your browser may connect directly to third-party services (for example Discord, Google Maps, Google Calendar, or social-media destinations).

Those third parties may set their own cookies or process your IP/device metadata under their own policies.

Examples in current website features:

- Google Maps embed on the contact page.
- Discord widget API request for public server presence.
- Google Calendar subscription links.
- External social-media links.

Necessary / Essential Cookies

Necessary cookies are used to provide core services such as login/session security, CSRF protection, and account/event workflow integrity.

Without these cookies/storage items, parts of requested functionality cannot be provided (for example login, secure form submission, recovery, and guest signup editing).

Functionality Cookies and Storage

Functionality cookies/storage are used to remember preferences and improve usability, such as dark-mode selection and cross-tab auth UI synchronization.

Cookies We Do Not Set by Default

The application does not set first-party analytics or advertising cookies by default.

Your Choices Regarding Cookies

If you prefer to avoid cookies, you can disable cookies in your browser and delete existing cookies for this website. You can also clear local/session storage via browser settings.

Please note: disabling essential cookies/storage can prevent authentication, secure request handling, account recovery flows, and certain event-signup features from working correctly.

If you would like to delete cookies or instruct your web browser to delete/refuse cookies, please visit your browser help pages:

- Chrome: [Google support](#)
- Internet Explorer: [Microsoft support](#)
- Firefox: [Mozilla support](#)
- Safari: [Apple support](#)

For any other browser, please visit your browser's official support pages.
